### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract:

In the amended abstract of February 23, 2006, line 1, "a" has been changed to -- A --.

The above change to the abstract has been made to correct an informality therein.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The Search Report of November 11, 2004 for the European Application 03 10 4164 indicates Japanese Patent 2000 352320 as an "X" reference against claims 1-4, and indicates U.S. Patent 4,773,846 as a "Y" reference against claim 7. With regard to amended claim 1, the Japanese Patent 2000-352320 discloses plural tubular elements 12 with nozzles 17, but does not disclose that the tubular elements have an inner space with the nozzles arranged on the inside of the tubular elements and oriented to inject into the inner space of the tubular elements. With regard to amended claim 7, U.S. Patent 4,773,846 discloses plural tubular elements 250, but does

Art Unit: 3745

not disclose that the plural tubular elements are arranged essentially parallel to the direction of flow of the intake airstream, and does not disclose at least two carrying walls arranged essentially perpendicular to the direction of flow of the intake airstream, into which at least two carrying walls the tubular elements are incorporated so that the tubular elements pass through the at least two carrying walls.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
